

IT'S NOT A HARD QUESTION

**“Mayor Streeter and city officials should be spending
“WE THE PEOPLES” (THE TAXPAYER) monies on worthwhile
projects... instead of wasting time and money on their
costly, hostile takeover of private industry.”**

- Gary Sullivan

“Nashua leaders should withdraw from any further action to take over and operate the Pennichuck water system. City monies would be better spent on other important activities!” - Robert Gravina

“Pennichuck is a great company. The service they provide is outstanding. Let's please keep things the way they are. The city has enough problems to worry about.” - Susan Diggins

“There are far better ways that the city could be spending money.”

- Ken Ashcraft

- More than 153 years of high-quality customer service.
- Safe, affordable, clean, reliable water.
- Employees with more than 1,000 years of experience in the water service industry.
- Water bill increases that pale in comparison to city budget increases over the last quarter century.

That's Pennichuck Corporation, New Hampshire's Oldest Continuously Operating Company.

- No experience controlling a water company.
- \$1.2 million down the drain pursuing a hostile eminent domain proceeding and still no plan.
- Cuts in vital city services such as police, fire and education.
- A 2006 4.3 percent property tax increase; additional 4 - 5 percent increase possible due to revaluation.

That's your current city of Nashua elected officials.

WHO DO YOU WANT RESPONSIBLE FOR THE WATER YOU DRINK?

Ask the candidates running for aldermen where they stand on the hostile, eminent domain takeover of Pennichuck and where they stand on being more fiscally responsible with your tax dollars.

Now is the time to be heard.
